NIRINA Isaia Joëlle

Profile

Passionate about creating digital solutions through innovation, I am always ready to take on new challenges and contribute to innovative projects while developing my skills.

Professional experience

Mobile Development Intern | CTMotors Madagascar

June 2025 - September 2025

- Developed a mobile application for order management for retailers using Flutter
- Integrated a dashboard with a Laravel backend
- Consumed APIs based on OData to retrieve and manipulate data from the internal system
- Designed the UI/UX with Adobe XD
- Explored databases and data within OData

Academic projects

Bakery Management Web Application | Jakarta EE / PostgreSQL

December 2024 - January 2025

- Designed and developed a web application for managing bakery products
- Defined the functional requirements of the project
- Designed the database using PostgreSQL
- Designed the application architecture using Jakarta EE deployed on WildFly

Shopping Mall Management Web Application | Stack MEAN / TailwindCSS

February 2026

Designed and developed a web application for shopping mall management with multi-profile access (Admin, Boutique, Client).

- Secure authentication (JWT, session and role management)
- Management of rooms, stores and products (stock / out-of-stock, promotions, sponsorship)
- Management of payments through a bank card payment gateway, generation of invoices and PDF export
- Management of events with participant tracking
- KPI dashboard, data visualization and real-time notification system
- Deployment and front-end/back-end integration
